

## Feedback questions

1. Walk me through your thoughts as you started the course up to now.

Well, i guess you know how i feel by now, we are nearing the end of the course and this non traditional way of teaching did not work for me. I did not learn a lot about healthcare administration and now know about swarm learning, a learning method that i will never use in my life. I still think this course missed the objective completely and i would not have taken it if i knew what it was all about. Utterly disappointed!!!

2. What were your thoughts on KT9 and KT10?

I thought all assignments were quite easy to do, one of them involved a lot of reading and several questions, doing the interview with a CEO was fun but pointless in the grand scheme of things. In summary, they did not advance my knowledge in the field.

3. What were your thoughts on EM11? What did you think of EssayBot?

Essay bot is a stupid app for lazy students who have bad grammar skills, it is completely pointless for complex topics. It is just a lazy cheater's tool and should not exist in my opinion.

4. Do you plan on writing a blog or essay? Please explain.

A blog since it is easier and less formal, my topic is quite complex and i plan to simplify it as much as possible.

5. What are your thoughts on Kialo (debate)?

Again, another useless platform that i will never use.

6. What are your thoughts on the class WordPress site? Is it too busy (is there too much)?

The WordPress site is a decent platform, i thought it does what it was supposed to do, just wished we had some meaningful content there!

7. What are your thoughts on the SL App? How can I improve it? How would you use it or should use it?

SL App is redundant and not useful. My advice is to remove it entirely. I will never use it.

8. Are you upset we did not do the Swarming the Canvas (SC) assignment? Please explain.

Not a bit. At this point, i could not care less, i feel cheated in this course, i did not learn much and end up doing those pointless assignments. So a swarming assignment that was removed is good riddance in my books. Sorry for being harsh.

9. Are the how-to video's still helpful? How can I improve them?

Not really, could just put the slides and we could read all about it. A lot of annoying sounds and prompts used to happen while you were talking and honestly i lack the patience to listen to anyone for more than 3 minutes.

10. If I were to remove KT15 and EM16 from the class, would that free up more time for you to focus on completing your essay or blog? Would it free up more time for you to focus on completing final exams for other classes? Please explain.

We would still complete FT17 (I would give everyone 50 points for both KT15 and EM16).

At this point, it does not really matter what you want to do, you could keep them or remove them, it is all the same for me. As you must have noticed, i am a hard worker and will do what i am told to do no matter how annoying it is. I would like to reiterate that this course was a complete waste of my time and a disappointment to say the least. The only comfort i have is that i will score well on it (Although not sure after my comments if this will happen). I pride myself in being vocal and honest about things that don't seem right and i have been under fire because of my statements in the past, but i am not here to bash this course, i just want to say that as a teacher, you failed to teach me anything about healthcare administration, and for this i am disappointed since the goal of me doing this MBA was to learn new things that might be useful for me in the future.

11. Should I replace the Healthcare textbook with a newer book? Please explain.

Please list textbook ideas if you know of any. I would like your perspective on what a "good" healthcare textbook is.

It is not about the HC textbook, it is about your teaching methodology. Some students are just afraid to say it but it does not work. It might make students seem happy since most will score an A on the course but it is not achieving its goal.

12. What are your thoughts on the Swarm Learning (SL) Textbook?

The SL textbook is not relevant to this course, i still do not know why i had to purchase it. I wish you put a disclosure before anyone signs up for the course that it is using the SL methodology and will be focused more on how to learn and not what to learn.

13. What do you think of the Feedback Indicator (two question) survey?

Well it is a good tool to change the orientation of the course but unfortunately, so many students just want a good grade and would refrain from saying anything disruptive to their plans.

14. Do you understand what I am trying to do with Swarm Learning? Please explain.

I understood completely that you are using a new unconventional learning methodology to unlock our minds but you missed the goal entirely. A very few learned about HC administration in this class.

15. In one sentence or paragraph, please explain (in your own words) what Swarm Learning is.

It is a made up learning technique that attempts to simplify things but ends up making them more complex and redundant.

16. What are your thoughts on Plectica?

It is an impractical platform that i will never use after this course.

17. What is the most beneficial program you have used in this class?

Wordpress site because it was required required but it was not a bad platform overall.

18. What are your thoughts on the weekly updates (I know they are not always weekly!)?

They are useful in keeping things organized.

19. What are your thoughts on the SL Facebook Group?

Useless and should not be used (Not a surprise here)

20. What is one thing you absolutely love about this course?

The one thing that i loved is that you appreciate feedback and attempt to listen to what we have to say.

21. What is one thing you absolutely hate about this course?

Well at this point, you know my answer, the SL methodology, the fact that we did not learn much about the topic.

22. How can I improve Swarm Learning?

You can improve it by not talking about it that much and incorporate it in the learning of the course in a subtle way that is not disruptive.

23. If you were to see this class again next year, what do you think it would look like?

Well i am not hopeful that it will change much, i don't think you will do any major restructuring based on my comments but it will be a pleasant surprise if you do.

24. Do you feel or think I used your feedback to change this class?

Yes you did but not to the extent that i hoped for, but again i had an extreme opinion to start with.
